

Mechanical Inspector

Hydro Group Plc is looking to recruit a Mechanical Inspector to work within their CNC Machine shop and Sub Contract Goods Inward area

The successful candidate will work within the company's existing team to verify first off, in process and final product acceptance of internally manufactured parts as well as parts produced by external sub-contractors

Quality Control Inspector Main responsibilities

- Visual and dimensional inspection using manual measuring equipment
- Dimensional inspection using a Coordinate Measuring Machine (CMM)
- Control of internally and externally calibrated measuring equipment
- Control and processing of documentation from externally purchased product
- Review and control of raw material certification ensuring material acceptance and traceability
- Liaising with sub contract suppliers on matters of non-conforming product issues
- Liaising with internal departments on matters of non-conforming product issues

Training and Experience

Essential requirements

- Previous experience of mechanical inspection of manufactured parts
- Previous experience of operating a Coordinate Measuring Machine
- Previous experience of maintaining calibrated measuring equipment
- Previous experience of working within a CNC machine shop environment
- Proficient in the use of Microsoft Office

Preferred but not essential

- Previous experience of dealing directly with sub contract supply chain
- Previous experience of using a CMM with Aberlink Mk4 software
